**FOR IMMEDIATE RELEASE**

### **Air Routing International Announces APIS Solutions<sup>™</sup>**

#### **APIS Solutions Service Allows ARI to Submit and Store Advance Passenger Information (APIS) Manifests On Behalf of the Client**

Houston, TX. May 2009. As APIS requirements expand worldwide, Air Routing International (ARI) is actively committed to developing solutions for APIS submission. While ARI has been providing solutions for U.S. commercial APIS and Caribbean APIS for years, ARI has now been approved by U.S. Customs and Border Protection (CBP) to meet U.S. private APIS requirements as a certified third party vendor.

APIS Solutions allows ARI the ability to submit Private APIS manifests on behalf of the Part 91 client. Each APIS submission will receive a confirmation of receipt from CBP, which will then be passed on to the client. Also, ARI's Flight Manager<sup>™</sup> allows clients unparalleled access to review their data and monitor the status of their APIS submission.

"Air Routing's APIS Solutions provides a seamless method of APIS transmission that eliminates the stress and hassle of meeting this U.S. Customs and Border Protection requirement", says Rick Snider, ARI's Operations Training and Standards Manager.
